StarWall

BY AGRON

OBSERVE
ANALYZE
PREVENT
ACT
BE CONFIDENT

ONE SYSTEM. A SAFER TOMORROW.

TOTAL
AWARENESS
IN ONE VIEW.

FROM DATA
TO DECISIONS.
ALL IN ONE VIEW.

WHAT IT IS

A unified security system that brings together all equipment on your yacht, in a marina, port or private island into one clear, actionable picture — instead of dozens of separate screens.

HOW IT WORKS

Connects to any existing equipment (radar, cameras, navigation, sensors) without replacement. Collects data → normalizes → analyzes → shows a clear threat level → suggests what to do.

WHO IS IN CHARGE

The human. StarWall accelerates and advises, but decisions and responsibility remain with the captain or designated person. It does not act autonomously behind the human's back.

WHAT IT CAN DO

 Sees the full situation in real time from all sources at once	 Remembers the history — nothing is lost after an alert is closed	 Learns on your site — over time more accurately distinguishes threats from routine	 Signals instantly and suggests the next step	 For known crises — clear step-by-step protocols; for new situations — connects a live specialist	 Automatically generates reports and statistics from all data	 No single point of failure — if one component fails, protection remains in place

SUBSCRIPTION LEVELS

LIGHT	ADVANCED	INTELLIGENCE	CUSTOM
Base connection - Essential integration and monitoring - Core features - Ideal for smaller vessels or first deployment	Risk and 24/7 support - Enhanced analytics 24/7 monitoring and support - Expert assistance - Preventive alerts - For yachts, marinas and ports	Self-learning - AI-driven adaptation - Higher accuracy - Advanced threat detection - Predictive analytics - Customized to your environment	Fully tailored to your asset - Individual configuration - Integration with any equipment - Special requirements - Dedicated team - For unique assets and complex infrastructures

THE BOUNDARY

StarWall is about information and decision support, not physical intervention. Any action that requires physical measures is a human decision and responsibility, not the system's.

EQUIPMENT

Works with third-party systems through adapters, but performs best with AGRON's own ready-to-deploy kits, built specifically for StarWall.

AGRON CONTAINER

A mobile or stationary solution with fully integrated equipment, optimized for StarWall. Rapid deployment for yachts, marinas, ports, private islands and special facilities.
